Medicinal and Biophysical Chemistry

Microbiology

- Medical Laboratory Science
- Pre-Medical Professional*

Physics

- Applied Physics*

Physiology*

- Pre-Medical Sciences*

Psychology*

- Pre-Med*

Plant Biology - Pre-Pharmacy

Sociology*

- Pre-Medical Science*

Statistics

Zoology*

- Ecology and Conversation Biology*
- Pre-Medical Sciences*
- Pre-Veterinary Science*

*** Degree allows early admission.**

Up to 30 hours from a doctoral health program may be substituted.

Biology, chemistry, physics, psychology and sociology are among the required prerequisites for most health professional schools. The College of Arts and Sciences provides these foundations, so CAS degrees are those most frequently chosen for solid preparation. Any CAS degree, when prerequisites are included, can prepare students for health professional schools. These degrees are designed with health professions in mind and for those seeking early admission to health professional schools.
