COLLEGE OF ARTS AND SCIENCES

Student Council

About

The Arts and Sciences Student Council serves as the voice of the undergraduate students in the College of Arts and Sciences. As the liaison between the students and the faculty, the Council's primary goal is to foster an atmosphere of learning that places students first. Through student programming, interaction with administration and faculty, and the promotion of the College's student organizations, the Council strives to enrich the experience of Arts and Sciences students. The Council also stresses service to the University and to the surrounding community.
